

AO Foundation Release Notice (V4R2M0)

Main additions to this version are;

1. Introduction of Level definition and environment/schema linking as the first phase in the introduction of the "Database Change Management" functionality.
2. The initial version of the program source repository, including the object cross-reference and impact analysis functions.
3. Introduction of feature based licensing.
4. Modification of UI objects in preparation for the introduction of National Language Support.
5. Significant improvement to the "Metadata" cross-check algorithms to improve accuracy.
6. Additional "Context Sensitive" Menus and other UI improvements.
7. Improvements to the handling of Constraints within the Work-Bench.
8. Addition of the functionality for D/B Change Management
9. Sundry bug-fixes, functional flow improvements and improvements to UI usability.
